Master Suite

Jacuzzi Tub

Shower

SECOND STORY ADDITION

Added a new second floor to include a master suite, guest room and office.

This petite bungalow was in serious need of more space and a facelift, both inside and out. By replacing the existing second floor, we were able to add a master suite, guest room and office that matched our client's dreams and budget.

Creative design work assisted in minimizing the cost of some challenging conditions.

Improvements include:

- *Curb Appeal*
- *New second floor with significant additional square footage*
- *Large master suite with shower and Jacuzzi tub*
- *Guest room and office*
- *Storage*

"Geoff Shafer is absolutely the best contractor I have ever worked with. I've had numerous contractors in my life but never had such a positive experience. Having Pegasus do the design work was fortuitous, as several unexpected glitches necessitated redesign along the way, which they did as a matter of course. The end result is spectacular. I wish I'd done this years ago."

- Eleni, Saugus
