
EXPANDED KITCHEN MASTER SUITE REMODEL

Exterior - Before

Completed Addition - Exterior View

Primary objectives for this project were to add a larger living and eating area to the existing kitchen, add a new master bath, common bath and laundry area.

Generous use of glass in the new eating area highlights access and views to the beautifully landscaped yard.

Adding a new door to the dining room increases the flow of the house while maintaining a formal dining area.

Moving the washer and dryer from the basement to the second floor simplifies laundry time for this Lexington family.

Improvements include:

- *Large eat-in kitchen*
- *French door to rear garden*
- *Soaking tub in master suite*
- *Kids bathroom*
- *Laundry room on second floor*
- *Walk-in closet and additional storage*
