
KITCHEN/FAMILY/BATH REMODEL - READING

New cabinets and granite counters

New Half Bath

Relocated family room, bath and storage

Goals for this project required a significant reorganization of the first floor in order to enlarge the kitchen, maximize the family room and relocate the half bath.

Walls, windows, doors, electrical and plumbing were moved to facilitate enlarging the existing kitchen and opening the space to include the family room.

The original bathroom and storage were moved to enhance the function and flow of the revised floor plan.

The kitchen was updated to include two sinks, a double oven and granite counters.

Improvements include:

- *Enlarged, state-of-the-art kitchen*
- *Relocated/more functional family room*
- *New half bath*
- *Open floor plan and improved traffic flow*
- *Improved entrance and access to the side and back yard*
- *Enhanced light both from the interior and exterior*
- *New door, windows, deck and rails*

“Stress free renovation with none of the problems I had heard can come with the process... very professional and courteous. I waited too long to do it.”

- Cathy, Home owner
